Searching for New Physics in Super Charm-Tau Factory

to consider that the rare decays of D meson might be more sensitive to new physics, and the rare decay $D^0 \rightarrow \mu^+\mu^-$ could be an ideal area to search for new physics because it is a flavor changing process In this work we look for a trace of new physics BSM in the leptonic decays of D^0 , concretely

Quality, Service Improvement and Redesign Tools: Theory of constraints What is it? Theory of constraints is an approach to identifying the most important limiting factor (ie constraint) that prevents any system or process from meeting its goal and then systematically improving that constraint until it is no longer the limiting factor Within
