Buckling - Other End Conditions

Buckling (Columns With Other End Conditions): However, in many engineering problems we are faced with columns with other end conditions The first condition we would like to consider is a column with one fixed end and one free (unguided) end By observation we see that this is identical to a pinned end column with a length of $2L$

Common Beam Formulas - University of Iceland

moment at the free end of the cantilever • $w'''(L)=0$ This boundary condition models the assumption that there is no shearing force acting at the free end of the beam If a concentrated force is applied to the free end of the beam (for example, a weight of mass m is hung on the free end), then this induces a shear on the end of the beam
